DETAILED ACTION

Response to Amendment

This Office Action is in response to the Applicants' amendment B, paper number 10, filed on March 3, 2003. Claims 1-5, 7-15, and 17 are pending and will be considered for examination.

Information Disclosure Statement

The information disclosure statement filed 2-17-00 fails to comply with 37 CFR 1.98(a)(2)(iii) because it does not include the listed application's specification, claims, and drawings. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Final Rejection

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 4, 7-10, 13-15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiecha (US Patent 5,870, 717) in view of Doyle et al (US Patent 5,694,551). Wiecha discloses a system and method for ordering items over a computer network using an electronic catalog comprising:

- A display means for displaying the information;

- A database with pre-approved catalogs for the user;
- A purchase approving means capable of storage of approval or rejection;
- A selecting means for selecting a desired article;
- An input means for inputting information representing approval or rejection of selected item;
- A user is notified of notified of price changes;
- Inputting the information about the wanted item;
- List of approvers;
- The deleting of a line item once an order has been placed with the vendor;
- Uses an internet browser on the client terminal;
- Uses an intranet; and Program code.

Wiecha does not disclose displaying the items of information in a list window capable of displaying the articles as a list. However, Doyle teaches displaying a vendor's catalog of items as a list (Figure 13; column 5, lines 21-26). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to incorporate the teachings of Doyle into the system and method of Wiecha. One of ordinary skill in the art would have been motivated to do so in order to use a well-known technique of displaying items. Wiecha also does not teach deleting the displayed items in response to input information representing approval of a purchase. However, Wiecha teaches deleting line items in response to placing an order. Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to delete the line items in response to input information representing approval of a

purchase. One of ordinary skill in the art would have been motivated to do so in order to allow an approver to keep track of which items were waiting to be processed.

Claims 2, 3, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiecha and Doyle in view of Langhans et al (US Patent 5,500,513). Wiecha and Doyle lack a group identifier. However, Langhans teaches the use of a division identifier. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Wiecha with a division identifier as taught by Langhans in order to facilitate the approval process. It behooves the approver to know what the requester does in order to determine if the request pertains to the work of the requester.

Claims 2-5, 12, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiecha and Doyle in view of Barnes et al (US Patent 5,970,475).

Barnes discloses purchasing control system comprising:

- A hierarchical structure identifier;
- Means to adjust the hierarchy;
- Department adjuster;
- Level of "authorization defining pre-selected goods/services that the user has available for viewing from said supplied catalog";
- Users having access to different areas depending on the tasks they perform;
- Purchase approving means notifying a user that a purchase price exceeds a predetermined limit;

Wiecha lacks the explicit disclosure of:

- The ranking of employees, and
- The determining the catalog based on the ranking.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Wiecha and Doyle with the means to rank employees as taught by Barnes in order to determine which employees were able to aid the approver in approving the request. It would also have been obvious to one of ordinary skill in the art at the time of the invention to provide Wiecha and Doyle with limiting the catalog for certain users as taught by Barnes in order to save time by limiting what a user could see in the vendor's catalog. Finally it would have been obvious to one of ordinary skill in the art at the time of the invention to provide Wiecha and Doyle with a means of notifying a user that a spending limit had been exceeded in order to ensure that a user did not exceed his or her limit.

Response to Arguments

Applicant's arguments with respect to claims 1, 10, and 17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

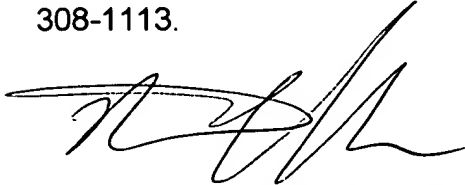

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
